2. Turck D, et al., ESPEN-ESPGHAN-ECFS guidelines on nutrition care for infants, children, and adults with cystic fibrosis, Clinical Nutrition (2016), <http://dx.doi.org/10.1016/j.clnu.2016.03.004>

Choose Best in Class. Choose DEKAs

Why is DEKAs best in its class?

Attribute	DEKAs	Alternatives
Absorption technology	Proven in clinical trials in CF and cholestasis ^{1,4}	No or based on in-vitro models
Taste masking technology	Yes	Rarely
Clinical studies in CF	Yes, 7 studies ^{1,4}	No
Rich in zinc, selenium, vitamin C, β-carotene, mixed tocopherols	Yes, rich in antioxidants with proven clinical benefits in CF ^{2,3}	Variable
Choice of Forms	Liquid, softgels, chewables, capsules	1 form per age group
Formulation	Water-based liquid	Oil-based liquid
Avoids high vitamin A	Yes. Vitamin A is given mostly as beta-carotene, not retinol.	No. Often vitamin A is given as retinol only.
Pregnancy	Avoids low/high vitamin A levels.	High vitamin A levels often possible.
Dose of Vitamin K1/day	0,5 – 2 mg, shown to be sufficient in clinical studies e.g. with DEKAs formulations ⁴ .	Usually lower or higher (5-10 mg), without clinical studies to justify these low or very high doses in CF.
Average cost per day	DEKAs is 100% reimbursed. Internet: priced competitively	Variable. Some products are low on expensive ingredients.

1. All studies were done with the DEKAs/AquADEKs formulation with its specific absorption technology. Doses of vitamin D and K were lower in the formulations used in the initial studies and later adapted to guideline compliant levels.
2. Sagel SD, et al. Effects of an antioxidant-enriched multivitamin in cystic fibrosis. Am J Respir Crit Care Med (2018) Sep 1;198(5):639-647.
3. Renner, S, et al. Effects of beta-carotene supplementation for six months on clinical and laboratory parameters in patients with cystic fibrosis. Thorax 2001; 56: 48-52.

Choose Best in Class. Choose DEKAs

Pourquoi DEKAs est-il le meilleur de sa catégorie ?

Caractéristique	DEKAs	Alternatives
Technologie d'absorption	Validée lors d'essais cliniques sur la mucoviscidose et la cholestase chronique ¹	Aucune validation clinique ou basée sur des modèles in-vitro
Technologie de masquage du goût	Oui	Rarement
Études cliniques sur la Mucoviscidose	Oui, 7 études ²⁻⁴	Aucune
Riche en zinc, sélénium, vitamine C, β-carotène, tocophérols mixtes	Oui, riche en antioxydants avec avantage clinique démontré dans la mucoviscidose ²⁻³ .	Variable
Choix des formes	Liquide, capsules molles, comprimés à croquer, gélules	1 forme par tranche d'âge
Formulation	Liquide à base d'eau	Liquide à base d'huile
Risque d'hyper-vitaminose A	Faible. La vitamine A est administrée principalement sous forme de bêta-carotène, facilement éliminable.	Existant. La vitamine A est souvent administrée sous forme de rétinol avec risque de surdosage.
Grossesse	Évite les niveaux faibles/elevés de vitamine A.	Des taux élevés de vitamine A sont tératogènes.
Dose de vitamine K ₁ journalière	Dose de 0,5 – 2 mg/j , validée cliniquement, y compris avec les formulations DEKAs ⁴ .	Parfois une dose inférieure ou supérieure (5-10 mg), sans validation clinique dans la mucoviscidose.
Coût moyen par jour	DEKAs est remboursé à 100%. Le site web-marchand à un prix compétitif.	Variable. Certains produits ont une faible teneur en ingrédients coûteux.

1. Toutes les études ont été réalisées avec la formulation DEKAs/AquADEKs avec sa technologie d'absorption spécifique. Les doses de vitamines D et K étaient plus faibles dans les formulations utilisées dans les études initiales et ont été adaptées par la suite à des niveaux conformes aux lignes directrices.

2. Sagel SD, et al. Effets d'une multivitamine enrichie en antioxydants dans la fibrose kystique. Am J Respir Crit Care Med (2018) Sep 1;198(5):639-647.

3. Renner, S, et al. Effets d'une supplémentation en bêta-carotène pendant six mois sur les paramètres cliniques et de laboratoire chez les patients atteints de fibrose kystique. Thorax 2001; 56: 48-52.

FR

Choisir délibérément. C'est choisir DEKAs

Warum die DEKAs Palette die beste ihrer Klasse ist

DE

	DEKAs	Alternativprodukte
Absorptionstechnologie	Nachgewiesen in klinischen Studien bei Mukoviszidose und Cholestase ¹	Nein oder basierend auf In-vitro-Modellen
Geschmacksmaskierung	Ja	Nein/Kaum
Klinische Studien bei Mukoviszidose	Ja, 7 Studien ^{1,4}	Nein
Reich an Zink, Selen, Vitamin C, β-Carotin, gemischten Tocopherolen	Ja, reich an Antioxidantien mit nachgewiesenen klinischen Vorteile bei Mukoviszidose ^{2,3} .	Variabel
Verschiedene Darreichungsformen	Lösung, Weichkapseln, Kautabletten, Kapseln	1 Darreichungsform je nach Altersgruppe
Formulierung	Auf Wasserbasis	Auf Ölbasis
Sicherheit in Bezug auf hohe Vitamin A Spiegel	Ja. Vitamin A wird vorwiegend in Form von β -Carotin verabreicht, nicht in Form von Retinol.	Nein. Oftmals wird Vitamin A nur in Form von Retinol verabreicht.
Schwangerschaft	Vermeidet niedrige/hohe Vitamin A-Werte.	Hohe vitamin A Werte sind oftmals möglich.
Vitamin K ₁ -Dosis /Tag	0,5 - 2 mg, was sich in klinischen Studien z.B. mit Formulierungen von DEKAs als richtig dosiert erwiesen hat ⁴ .	In der Regel niedriger oder höher (5-10 mg); ohne klinische Studien, die diese niedrigen oder hohen Dosen bei Mukoviszidose rechtfertigen.
Durchschnittliche Kosten pro Tag	DEKAs wird oftmals zu 100 % erstattet. Internet: wettbewerbsfähige Preise	Variabel. Einige Produkte enthalten kleinere Mengen der teureren Zutaten.

1. Alle Studien wurden mit den Formulierungen DEKAs/AquADEKs durchgeführt, die über eine besondere Absorptionstechnologie verfügen. Die Dosen von Vitamin D und K waren in den Formulierungen, die in den ersten Studien verwendet wurden, niedriger und wurden danach an die richtlinienkonformen Werte angepasst.

Wählen Sie Bewusst. Wählen Sie DEKAs

¿Por qué DEKAs es el mejor producto de su clase?

Característica	DEKAs	Otros productos
Tecnología de absorción	Probada en ensayos clínicos sobre fibrosis quística y colestasis ¹	Ninguna o basada en modelos in vitro
Tecnología de mejora del sabor	Sí	Raramente
Estudios clínicos en FQ	Sí, 7 estudios ^{3,4}	No
Rico en zinc, selenio, vitamina C, β-carotenos, tocoferoles mixtos	Sí, rico en antioxidantes con beneficios clínicos probados en FQ ^{2,3} .	Variable
Variedad de formas farmacéuticas	Líquido, cápsulas blandas, pastillas masticables, cápsulas	Una sola forma farmacéutica por grupo de edad
Formulación	Líquido de base acuosa	Líquido a base de aceite
Evita altos niveles de vitamina A	Sí. La vitamina A se administra principalmente como betacaroteno, no como retinol.	No. A menudo la vitamina A se administra solo como retinol.
Embarazo	Evita alcanzar niveles bajos o altos de vitamina A.	A menudo pueden alcanzar niveles altos de vitamina A.
Dosis de vitamina K ₁ /día	De 0,5 a 2 mg, que se ha demostrado en estudios clínicos, por ejemplo con formulaciones de DEKAs ⁴ , a ser una dosis suficiente.	Suele ser más baja o más alta (5-10 mg), sin estudios clínicos que justifiquen estas dosis en FQ.
Coste promedio por día	A menudo DEKAs se reembolsa al 100 %. Internet: precios competitivos	Variable. Algunos productos tienen poca cantidad de ingredientes costosos.

1. Todos los estudios se hicieron con la formulación DEKAs/AquADEKs con su tecnología de absorción específica. Las dosis de vitamina D y K fueron inferiores en las formulaciones utilizadas en los estudios iniciales. Posteriormente, se adaptaron para cumplir con los niveles establecidos en las directrices.
2. Sagel SD, et al. Effects of an antioxidant-enriched multivitamin in cystic fibrosis. Am J Respir Crit Care Med (2018) Sep 1;198(5):639-647.

Elija el mejor de su clase. Elija DEKAs

Porque DEKAs é o melhor da classe?

Características	DEKAs	Alternativas
Tecnologia de absorção	Testado em ensaios clínicos em Fibrose Quística e colesterol ¹	Não há, ou têm como base modelos in vitro
Tecnologia de dissimulação do sabor	Sim	Raramente
Ensaios Clínicos em FQ	Sim, 7 es ^{1,4}	Não
Rico em zinco, selénio, vitamina C, β-caroteno, tocoferóis mistos	Sim, rico em antioxidantes com benefícios clinicamente provados em FQ ^{2,3} .	Variável
Escolha de apresentações	Líquido, softgels, comprimidos mastigáveis, cápsulas	1 apresentação para cada grupo etário
Formulação	Líquido de base aquosa	Líquido de base oleosa
Evita a vitamina A elevada	Sim. A vitamina A é proporcionada maioritariamente como beta-caroteno, não como retinol.	Não. Frequentemente a vitamina A é fornecida apenas como retinol.
Gravidez	Evita o teor elevado/baixo de vitamina A.	Frequentemente é possível a aparição de elevado teor de vitamina A.
Dose de Vitamina K ₁ /dia	0,5 – 2 mg, demonstrou ser suficiente em ensaios clínicos e.g. com as formulações DEKAs ⁴ .	Frequentemente mais alto ou mais baixo (5-10 mg), sem ensaios clínicos que justifiquem este teor baixo ou muito elevado em FQ.
Custo médio diário	DEKAs é frequentemente comparticipado. Internet: preço competitivo	Variável. Alguns produtos têm baixo teor dos ingredientes mais caros.

1. Todos os ensaios foram feitos com a formulação DEKAs/AquaDEKs com a sua tecnologia específica de absorção. O teor de vitamina D e K foi mais baixo nas formulações utilizadas nos ensaios iniciais e adaptados posteriormente para níveis de compatibilidade com as diretrivas.

2. Sagel SD, et al. Effects of an antioxidant-enriched multivitamin in cystic fibrosis. Am J Respir Crit Care Med (2018) Sep 1;198(5):639-647.

3. Renner, S, et al. Effects of beta-carotene supplementation for six months on clinical and laboratory parameters in patients with cystic fibrosis. (2001, June 56). 48-52

Escolha o Melhor da sua Classe. Escolha DEKAs

Почему витамины DEKAs лучшие в своей категории?

Параметр	DEKAs	Альтернативы
Технология абсорбции	Проверены в клинических испытаниях у пациентов с муковисцидозом и холестазом ¹	Нет или проведены на моделях <i>in vitro</i>
Технология маскировки вкуса	Есть	Редко
Клинические исследования у пациентов с муковисцидозом	7 исследований ^{1,4}	Нет
Высокое содержание цинка, селена, витамина С, бета-каротина, смешанных токоферолов	Да, богат антиоксидантами с доказанными клиническими эффектом при муковисцидозе ^{2,3} .	Варьируется
Лекарственная форма	Жидкость, мягкие желатиновые капсулы, жевательные таблетки, капсулы	1 форма на каждую возрастную группу
Формула	Жидкость на основе воды	Жидкость на основе масла
Не содержит излишнего витамина А	Да. Витамин А содержится в основном в форме бета-каротина, а не ретинола.	Нет. Часто витамин А содержится только в форме ретинола.
Беременность	Содержание витамина А ни слишком высокое, ни слишком низкое.	Часто возможны высокие уровни витамина А.
Суточная доза витамина К1	0,5–2 мг. Клинические исследования, например с лекарственными формами DEKAs ⁴ , показали, что это достаточное количество.	Обычно ниже или выше (5–10 мг), без клинических исследований, подтверждающих такие слишком низкие или слишком высокие дозы при муковисцидозе.
Средняя стоимость в день	Стоимость DEKAs может покрываться страховкой. Интернет: конкурентная цена	Варьируется. Некоторые средства имеют низкое содержание дорогих ингредиентов.

1. Все исследования проводились с лекарственными формами DEKAs/AquADEKs с их специфической технологией всасывания. Дозы витамина D и K в лекарственных формах, использованных в изначальных исследованиях, были ниже, а затем изменены в соответствии с рекомендациями.

DEKAs® Plus
liquid
with sweetener(s)

Product information: DEKAs Plus liquid, food for special medical purposes. For the dietary management of patients with cystic fibrosis on the specific recommendation of a specialist in cystic fibrosis. DEKAs Plus is a multivitamin and mineral supplement that contains higher amounts of fat-soluble vitamins. DEKAs Plus utilizes a clinically tested delivery technology to enhance absorption of fat-soluble vitamins and nutrients. **Important notice:** Use only under medical supervision. Unless medically advised, do not administer to children under 4 years of age. Not for parenteral use. Cannot be used as a sole source of nutrition. The product poses a health hazard if consumed by persons who do not have the disease (s), disorder(s) or medical conditions for which the product is intended. Use during pregnancy and/or combined use with anticoagulants only after consultation with a doctor. **Use and storage:** Do not use if the seal is broken or missing. Shake well before use. Keep out of reach of children. Store at room temperature. Refrigerate after opening. Use within 60 days of opening. **Recommended dosage:** 1 ml per day or as directed by a physician. Dosing should be guided by serum vitamin levels. **Allergens:** none.

Ingredients: water, L-ascorbic acid, sodium-L- ascorbate, D-alpha-tocopheryl polyethylene glycol-1000 succinate, zinc gluconate, beta-carotene, D-alpha-tocopherol, antioxidant (tocopherol-rich extracts), nicotinamide, natural and artificial flavors, calcium D-pantothenate, sweetener (sucralose), coenzyme Q10, thiamin hydrochloride, riboflavin 5'- phosphate sodium, cholecalciferol, pyridoxine hydrochloride, retinyl palmitate, preservatives (potassium sorbate, sodium benzoate), phytomenadione, selenomethionine, D-biotin.

DEKAs® Plus

chewable tablets

with sugar(s) and sweetener(s)

Product information: DEKAs Plus chewable tablets, food for special medical purposes. For the dietary management of patients with cystic fibrosis on the specific recommendation of a specialist in cystic fibrosis. DEKAs Plus is a multivitamin and mineral supplement that contains higher amounts of fat-soluble vitamins. DEKAs Plus utilizes a clinically tested delivery technology to enhance absorption of fat-soluble vitamins and nutrients. **Important notice:** Use only under medical supervision. Cannot be used as a sole source of nutrition. Can be used from the age of 4 years. The product poses a health hazard if consumed by persons who do not have the disease(s), disorder(s) or medical conditions for which the product is intended. Use during pregnancy and/or combined use with anticoagulants only after consultation with a doctor. **Use and storage:** Do not use if the seal is broken or missing. Keep out of reach of children. Store at room temperature. **Recommended dosage:** Age 4 to 10 years: 1 chewable tablet daily or as directed by physician. Over age 10: 1-2 chewable tablets per day as directed by a physician. Dosing should be guided by serum vitamin levels. Take with meals. **Allergens:** none.

Ingredients: sugar, dextrose, natural flavors, sodium-L-ascorbate, sweetener (sorbitol), bulking agent (hydroxypropylcellulose), beta-carotene, D-alpha-tocopherol acid succinate, anti-caking agent (calcium silicate), flavor (citric acid), zinc bisglycinate, nicotinamide, cholecalciferol, phytomenadione, D-alpha-tocopherol polyethylene glycol-1000 succinate (TPGS), calcium D-pantothenate, anti-caking agent (magnesium stearate), D-biotin, coenzyme Q10, pyridoxine hydrochloride, retinyl palmitate, sodium selenite, thiamin mononitrate, riboflavin, sweetener (sucralose), anti-caking agent (silicon dioxide), cyanocabalamin, antioxidant (mixed tocopherols), folic acid.
